

# Amazing Earth: facts that fascinate

## Website search

Try the following activities to build up a list of facts about Earth Science that fascinate *you* by searching the internet. One starting point is to use a search engine – ‘Google’ ([www.google.com](http://www.google.com)) is a popular one, but you may have your own particular favourite. An alternative is to visit some of the sites on the useful web sites link on the home page at [www.jesei.org](http://www.jesei.org) and follow links from there.

If you use a search engine, think carefully about sensible terms to search for.

- Q 1. Find your own ‘top ten’ amazing facts about the Earth from a website search.
- Q 2. Note them down in order, from the ‘most amazing’ at the top
- Q 3. How many of your top ten amazing facts may cause death?
- Q 4. How many of your amazing facts were about the Earth’s future?
- Q 4. How many of your amazing facts were about the Earth’s past?
- Q 5. How many of your amazing facts might affect you tomorrow?
