

## Activity S 2: Considering ways to encourage people to save water

This activity builds on activity WS1. It allows pupils to compare the results recorded in the charts produced for activity WS1 and to think about ways of saving water and ways of encouraging people to avoid wasting water.

1. In small groups ask students to compare their records of water use and work out ways they could save water (e.g. taking short showers instead of deep baths; not leaving the tap running when cleaning teeth).
2. Ask each group to design a poster that would encourage people to avoid wasting water.
